Using *Films on Demand* in Moodle:
We recommend using the link *Films on Demand* provides:

This link includes the proxy server prefix so off-campus users will be prompted to log in, but then will be able to view the video. It also works on iPads.

*Films on Demand* also offers embedding code to cut and paste to have the video appear directly in Moodle, but we have found this to be problematic.

**Searching by Segment:**
The default search setting is to find your keywords in film Titles. If you wish to search Segment titles (3-4 minute clips within full films), simply use the drop-down menu next to the search box and select “By Segments.” This has to be re-selected each time you create a new search:

**Browsing:**
Finally, Films on Demand allows you to browse films by collections (topic) or by producer:
