

Chemistry Colloquium-- Fall 2008

<u>Date</u>	<u>Speaker</u>	<u>Title</u>
September 5	John Stutzman	<i>Towards Enabling Hydride as a Leaving Group: Carbon Kinetic Isotope Effect on the Hydride Abstraction of 1-Phenylethanol</i> (Research performed during an REU program at USC)
September 12	Trisha Lindenmuth	<i>Electrodes Modified with Polyoxometalates Using Layer-by-layer Assembly: Applications in Catalysis and Chemical Sensing</i> (Research performed during an REU program at Auburn University)
September 19	Oscar Wheeler	<i>Synthesis of an Anion Specific Sensor</i> (Chemistry 449; Research performed during an REU program at the University of Southern Mississippi)
October 10*	Dr. Jason Stamm U.S. Air Force	<i>On Being a Doctor in the Air Force</i> The William and Barbara Haller Endowed Lectureship in Biology and Chemistry
October 17	Dr. Anne Andrews Penn State	<i>In Vivo Approaches to Investigating Serotonin Neurochemistry: From Micro- to Nanoscales</i>
November 14	Dr. Greg Paris Novartis	<i>Roles of Computational Science in Drug Discovery: It's Not All Chemistry</i>
November 21	Alex Hunter	<i>Organometallic Ruthenium Complexes: Synthesis and Nuclear Magnetic Resonance Studies</i> (Chemistry 470)
December 1 (Monday)	John Stutzman	<i>Outgassing of Common Electronic Devices</i> (Chemistry 449)
December 3 (Wednesday)	Kyle Totaro	<i>A New Ligand for Samarium Diiodide</i> (Chemistry 449)
December 5	Dr. Paul Williard Brown University	To Be Announced

* The Haller Lecture is held at 4:00 pm in Heim G-11. All other talks begin at 3:15 pm in Heim G-09.
